

COLIBO® ADOPTION

Tailor-made consulting and services

GET EVEN MORE OUT OF YOUR COLIBO SOLUTION

Microsoft 365

©Colibo 2021

Colibo now gives you the option to have a dedicated Colibo consultant who, based on your installation, organization and requirements, will take your intranet solution to the next level.

The employee's working day is becoming ever more digital. The amount of data in our organisations is exploding, more and more systems need to be overseen, with only a minimal amount of glue holding them all together.

Not only does data need to be accessed from several devices, we are also working more and from more widespread locations. The risk of losing the employee and making errors in our digitization is higher than ever.

You have chosen a Colibo solution to manage your internal communication and coordination. With this choice and Colibo's development from a pure intranet to a **Workplace Integration Hub**, you already have a good system in place and a fantastic tool that gives individual employees easy access to your entire digital environment, not to mention a good, strong intranet.

YOUR INTRANET SHOULD MEET TO YOUR NEEDS

We want to ensure that you maximise all relevant opportunities in your solution - both now and in the future.

GET MORE VALUE FROM YOUR INTRANET

We ensure that your Colibo solution continues to match your needs.

INCREASE DIGITAL WELL-BEING

We make the value of your intranet both measurable and transparent by improving one fundamental KPI.

About Colibo Adoption

By working with a dedicated Colibo adoption consultant, your Colibo solution will be adapted to the needs of the individual department. The user experience is adapted and expanded, allowing employees to get a much more relevant user experience, thus creating value and increasing the employee's digital well-being. You decide the scope – together with the consultant.

Colibo Adoption gives you

- An adoption consultant who works with you to get the most out of your solution, and who helps you to configure Colibo to suit your exact organization.
- The consultant listens to the needs of individual employees and departments and you all work together to improve and refine your existing solution.
- This process includes a super user course with “train the trainer”, which can then serve as a template for further learning processes around Colibo's solution.
- The design is adapted to the department's needs, proper department pages are set up, onboarding processes are designed and the third-party systems and specialist systems that are important to the department are integrated into Colibo.

Measurable value

In short, the Colibo and adoption superstructure should lead to the improvement of one fundamental KPI:

Digital well-being

Digital well-being is a fantastic measuring point to check that your employees and colleagues are able to follow you on the digital journey in your organization, and Colibo's adoption consultant will, together with you, arrange pre- and post-measurements that provide a target score per organisational unit for the employee's digital well-being.

By following up this target score, you will be able to see if the consultant's work with you and your Colibo solution increases the digital well-being in the organization, allowing for improved digitization.

Price

A time frame is agreed with the consultant, as well as the specifics of the process and where in your office the consultant can work during parts of this period.
